Today it's all about the latest efforts, on-time manufacturing, delivery and testing of communication systems from Aeromaritime. The 50-year celebration with more than 70 friends and guests at Feinkost Käfer in Munich. Also about the presentation of the 50-year honorary certificate of the IHK Munich. Finally, about two new hires for the position of sales director and software development manager in order to set sails for the next 50 years.

Actualities

Successful delivery of the last ICS on F125 signed-off in Aug. 2021. During the last months Aeromaritime has made great efforts to manufacture delivery and testing of communication systems for two NATO Mediterranean countries. On one side Communication System Kits have been delivered in order to ensure on-time system integration and Harbour Acceptance Test at our customer's submarines 3 & 4 out of 6.

On the other side, the System Integration Team successfully conducted Harbour Acceptance Tests on our IFF equipment on Fast Patrol Boats. Further tests on follow-on vessels are planned for spring 2022.

Specials

The company has become 50 years old this year and the celebration took place as planned at the Feinkost Käfer in Munich. Many friends and guests from politics, industry and business celebrated the special event that evening until midnight. Our guests enjoyed the exquisite dishes and were also accompanied musically by the Servi family with traditional Bavarian music. The highlight of the evening program was the performance of the well-known comedian Wolfgang Krebs, he did his best to parody Bavarian politicians as Söder, Stoiber and Seehofer.

50-Year Honor Certificate

On the occasion of this year's company anniversary, Mr. Manfred Gößl, Chief Executive Officer of the Chamber of Industry and Commerce for Munich and Upper Bavaria, presented the honorary certificate for the "50th anniversary" at the company headquarters in Neufahrn.

From right: Managing Director Jan Molter, General Manager IHK Munich Manfred Gößl and Mr. Gregorio Arreytunandia.

Portraits

The company continues to hire new employees to strengthen Aeromaritime's path for the future:

Jens Wachsmann is the new Director Sales & Marketing at Aeromaritime Systembau GmbH.

Jens Wachsmann, will join the company on February 1, 2022. Jens Wachsmann will report to Jan Molter, Managing Director. He has many years of experience in the international systems business. He began his career in 2001 at Rheinmetall Landsysteme and, after holding various sales positions, was most recently Vice President Sales at thyssenkrupp Marine Systems and ATLAS Elektronik. In this role, he was responsible for the business development in Far East Asia and Eastern Europe.

Likewise Dr. Lilit Amirhanyan was also hired as a software developer located at Aeromaritime's office, the software development center in Chemnitz. Her tasks will be to maintain Aeromaritime's proprietary Advanced Platform Communication System APCOS 4000 and will drive further software product development.

Outlook

In the 1st quarter 2022 Aeromaritime will be setting up its follow up and maritime maintenance office in Wilhelmshaven next to the F125 in order to perform the TLB tasks.

A first batch of replacements of equipment under the contract signed in Dec. 2020 has been delivered in Dec. 2021.
